

Route to Roof

Route to Roof

Route to Roof

A service that brings together information into one place about all of the services that are available to support someone experiencing homelessness.

The problem this solves

Currently it can be hard to find out what services are available to offer support, what their support might look like, what their eligibility criteria is and how best to contact them.

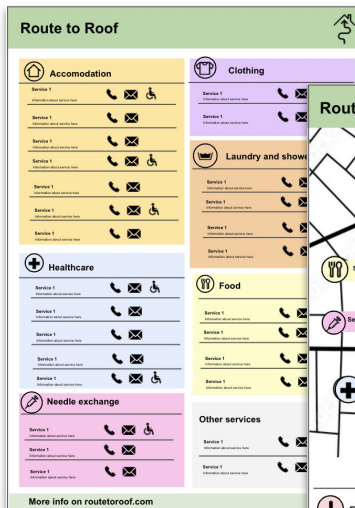

How it works

Route to Roof brings all service information into one place in a structured way, people can view this information in a list or map format and can filter the services based on needs. The information is kept up to date by service providers being able to log in and update a template of their information every few months.

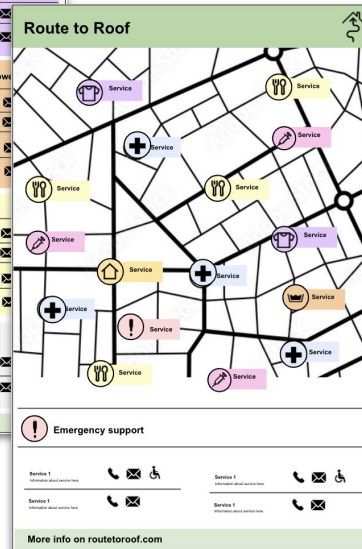

Question:

What are the key features this must include?

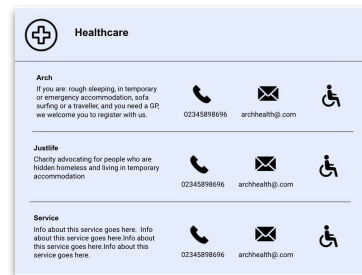

One side of paper map

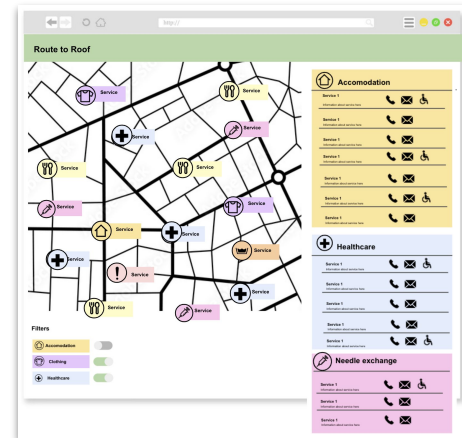

Other side of paper map

Information about a service you can see on paper map

Online version, that can be filtered

The paper map

The paper map will need to be carefully designed so that it includes the key services without being overwhelming.

Question:

What services should be prioritised to go on the paper map?

The online map will enable people to filter services based on need

People can filter services based on the type of service they are looking for and if they are accessible.

Question:
What should the filter categories be?

The online map will give people access to detailed information about a service

There could be an easy to use template that service providers are asked to fill out to ensure Route to Roof can provide people with all of the key information they need about a service.

Question:

What should be included in this template?

Route to Roof

Justlife

Information about the service:
Charity advocating for people who are hidden homeless and living in temporary accommodation level, our works with homeless and advocate for solutions to hidden

Helping people living in temporary accommodation move away from homelessness
